

MRSA

Methicillin

Resistant

Staphylococcus

Aureus

The Centers for Disease Control and Prevention recently calculated that MRSA is responsible for 94,000 serious infections and nearly 19,000 deaths per year in the United States. These numbers make MRSA responsible for more deaths each year than AIDS.

Mada

For 40 years, Mada has been providing safe, effective solutions for Infection Control.

The following products have specific claims for killing the MRSA bacteria.

MadaCide-FD (Fast Drying) and **MadaCide-1**.

Both products are EPA registered, hospital level disinfectants that are safe for the environment.

They are designed to clean and disinfect hard, non-porous surfaces in a wide variety of healthcare settings, including home health care.

MadaCide-FD contains alcohol to facilitate drying, while **MadaCide-1** offers an alcohol-free alternative.

MadaGel Instant Hand Sanitizer with moisturizers provides broad spectrum antimicrobial effectiveness against MRSA, E. coli and VRE.

MadaFoam Plus Foaming Instant Hand Sanitizer with Aloe and Vitamin E kills 99.9% of many important organisms, including MRSA, E. coli and VRE.
